Summary

The Director Data Science will collaborate within US Innovative Medicines is the Novartis engine for achieving best in class Healthcare provider (HCP) experience and transformative digital patient engagement. The Enterprise Analytics and Data Science group within IDS is seeking a highly motivated machine learning/ AI expert and leader to push the frontiers in HCP segmentation and digital patient engagement. The person will possess deep technical expertise in AI/ machine learning and its applications in HCP and patient segmentation and behavioral analytics. In addition to being a technical expert, this person will also engage with commercial partners to bring meaning and context to analytic outcomes, driving actionability of learning and results. The person will partner with other data science organizations in Novartis to develop “best in class” methods/algorithms.

Location: The ideal location for this role is East Hanover, NJ site but remote work may be possible (there may be some restrictions based on legal entity). Please note that this role would not provide relocation as a result. If associate is remote, all home office expenses and any travel/lodging to specific NJ site for periodic live meetings will be at the employee’s expense. The expectation of working hours and travel (domestic and/or international) will be defined by the hiring manager. This position will require some travel.

About the Role

Major accountabilities:

- Lead the data science team in the development and implementation of innovative data-driven solutions that drive business growth
- Lead the development and deployment of generative AI models, ensuring innovative solutions are implemented to drive strategic business outcomes, enhance data-driven decision-making, and foster technological advancements across various sectors.
- Lead the development and deployment of generative AI models, ensuring innovative solutions are implemented to drive strategic business outcomes, enhance data-driven decision-making, and foster technological advancements across various sectors.
- Oversee the integration and application of large language models (LLMs), setting standards for model training, evaluation, and scaling, while ensuring ethical AI practices and compliance with regulatory requirements.
- setting standards for model training, evaluation, and scaling, while ensuring ethical AI practices and compliance with regulatory requirements.
- Manage and mentor the data science team to ensure the delivery of high-quality work
- Stay up-to-date with the latest advancements in data science and identify opportunities to leverage these advancements to enhance our products and services
