

Assoc. Director, Technical Solution Delivery, Global Clinical Operations

Job ID
REQ-10018830
Aug 13, 2024
Spain

Summary

Location: Barcelona
#LI-Hybrid

In this role you will create the detailed Data Digital & IT (DDIT) solution/service design, based on functional specifications to meet quality and performance requirements and technical constraints. You will be responsible for detailed design, development, code review and delivery of system solutions

About the Role

Key Responsibilities:

- Responsible for detailed design, development and delivery of system solutions for a specific business or technology area in alignment defined solution architecture and create the detailed process designs necessary to operate the software/service on a day to day basis
- Take accountability for technical delivery of projects/use cases for a specific business area
- Ensure that detailed designs adhere to solution architecture design (i.e. high level conceptual design)
- Ensure designs produced adhere to architectural roadmap, support the development, execution and operations of software/service and are traceable to functional as well as non-functional requirements in functional specification.
- Provide comprehensive and authoritative technical guidance and ownership on a wide range of aspects within the area of project execution to influence internal and/or external stakeholders. Ensure the overall user experience is considered when designing new solutions and services
- Take accountability to ensure adherence with Security and Compliance policies and procedures within Service Delivery scope. Individual contributor with responsibility for high to medium sized complexity of projects

Role Requirements

- Bachelor's degree in Computer Science, Computer Engineering or related technical discipline or equivalent experience demonstrated experience
- 12+ years of experience with expert understanding and proven track record in analyzing business processes, architecting, designing, developing and integrating complex, cross-divisional end to end technical solutions with large data volumes.

- Should have a background in programming and solution design. Exposure to a wide range of technologies is preferred. Experience in integrating or implementing Commercial off-the-shelf products
- Excellent verbal and written communication skills with ability to interact with senior IT and business stakeholders. Ability to effectively convey complex technical concepts to a non-technical audience.
- Self-starter with ability to work autonomously in a highly matrixed and multi-cultural environment, taking full ownership of deliverables.
- Experience in highly regulated environments, ideally in the Pharma industry, including on Computer System Validation. Experience working in Agile Scrum teams
