Provide analytics support to Novartis internal customers on various high complexity analytical products. Bring in product 1st approach and strive towards taking product to success, thinking on overall product strategy, their roadmaps, KPI's, success metrics etc. to derive maximum value out the product.

Education:  
Bachelors/ Masters in computer sciences/ IT or other quantitative sciences

## About the Role

### **Position Title: Manager – Product Analytics**

Location: Hyderabad #LI Hybrid

About the role:

Provide analytics support to Novartis internal customers on various high complexity analytical products. Bring in product 1st approach and strive towards taking product to success, thinking on overall product strategy, their roadmaps, KPI's, success metrics etc. to derive maximum value out the product.

### **Key Responsibilities:**

- Working knowledge of multiple datasets e.g. LAAD, Xponent, SMART etc. and managing and organizing data sets from databases to find patterns and trends in data.
- Transforming these complex and granular data into actionable insights.
- Putting together specifications to extract/transform data into required formats for different analytical elements using SQL/DSS or other data processing tools.
- Require experience in quantitative analysis with a demonstrated focus in analytics, and experience with coding languages (SQL OR Python) to query and extract data. Also, experience with BI tools, working with very large data sets is a plus.
- Create the foundation for more sophisticated approaches to APLD analysis and advanced analytics wherever it is required and beneficial.

### **Essential Requirements:**

- 5-7 years' experience in a Global pharma company as data analyst, business analyst or product analysts
- Bring deep business understanding of pharmaceutical industry and data standards with domain experience in at least one of the following areas – a) Pharma R&D, b) Manufacturing, Procurement and Supply Chain and c) Marketing and Sales

- Have good knowledge of Statistical modeling, AL and ML and should have hands on experience with AI/ML projects
- Good communication and interpersonal skills. Conceptual, analytical & tactical thinking, strategic thought process
- Ability to multi-task, work in a demanding global team environment, work under tight deadlines. Develop and maintain strong individual and team performance.
- Hands-on experience of ETL and programming/scripting skills (SQL, Python, Snowflake, Databricks Or Dataiku) for data preparation and analysis
